Unit 9 • Lesson 10

Exercise 2 • Sort It: Word Meanings

- ▶ Listen and follow along as your teacher rereads the last paragraph of “New Old Insects” below.
- ▶ Listen for words that name **kinds of insects** and **parts of insects**.
- ▶ Underline them in the text below when you hear them.
- ▶ Sort the words into the table categories.

from “New Old Insects”

The new order of insects is called *mantophasmatodea* (pronounced 'mǎn-tə 'fǎz-mə 'tō-dē-ə). These insects have a nickname: Gladiators. They look like other insects, such as the walking stick or the praying mantis. But they are predators. They have long antennae, sharp jaws, and three small teeth. Until this time, they were unknown. There had been no books on these insects. Now they are recorded! They are a new order! They are new old insects!

Kinds of insects	Parts of insects

Exercise 3 • Define It

- ▶ Listen and follow along as your teacher reads the text below.
- ▶ Sort the underlined words into the “Category” or “Attributes” column.
- ▶ Use the text to define the word **mantophasmatodea**.
- ▶ Use the category and attributes words to write a definition.

based on “New Old Insects”

The new order of insects is called *mantophasmatodea*. These insects have a nickname: Gladiators. They look like a praying mantis. They are predators. They have long antennae, sharp jaws, and three small teeth.

Mantophasmatodea:
