2. The wind affected the crops.

3. Children collected things.

*(continued)*

**Exercise 2** *(continued)* • **Diagram It: Subject, Predicate, and Direct Object**

4. Lemons love sun.

5. The code vanished.

## Unit 13 • Lesson 8

### Exercise 3 • Use the Clues

- ▶ Use context clues to define **dirigible**.
  - Underline the vocabulary word.
  - Read text surrounding the unknown word.
  - Underline the words and meaning signals that help define the unknown word.
  - Identify and circle the pronoun that refers to the target word.
  - Draw an arrow to show the link between the pronoun and the noun it refers to.
  - Put a box around a synonym for **dirigible**.

**from “Way to Go!”**

#### **Now That’s a Big Balloon!**

Can you imagine a dirigible that can carry big loads of cargo and passengers? A dirigible is sometimes called an airship. Actually, it’s a huge helium balloon. Propellers move it. It’s similar to a blimp. You’ve seen blimps on TV. They carry television crews over sports fields. There is a difference between a dirigible and a blimp. A dirigible has a rigid inside frame. This means it can be much bigger than a blimp.

- ▶ Write a definition based on the context clues.
- ▶ Use a complete sentence.
- ▶ Verify your definition with the dictionary or [www.yourdictionary.com](http://www.yourdictionary.com).

**dirigible**—

---

---

- ▶ Complete the following sentence:

A synonym for dirigible is \_\_\_\_\_.

**Exercise 4 • Answer It**

- ▶ Underline the signal word in each question.
  - ▶ Write the answers in complete sentences.
  - ▶ Check for sentence signals—capital letters and end punctuation.
1. Plastic like that in juice containers can be used to produce cars. Generalize what other types of containers could provide plastic for the same purpose.

---

---

---

2. Different types of gas have been used to fill dirigibles. What can be inferred about the safety of helium as opposed to hydrogen?

---

---

---

3. Explain why a person does not need a pilot’s license to operate a ground-effect plane.

---

---

---

4. Michael Whiting invented a wheelchair that can be used in mountain-trail racing. Generalize other off-road settings where this wheelchair could be used.
